

RH-2

RH-2 DUAL CAMERA AND DATA TAXI CAMERA:

● Dual Camera and Data:

Fitted with wide angle internal and external facing cameras with infra red night vision. 340 degree driver protection.

● Accident Image Storage:

Records on a constant loop overwriting up to 15 hours of video. Events are kept when adverse g-force is detected or an emergency button is pressed.

● Location Information Storage:

The device records and stores detailed GPS information including the time, speed and location. It is possible to see the exact geographical position of a vehicle over a 12 hour period.

● Google Map:

Supplied PC Software overlays the vehicles position and GPS coordinates in a visual display using Google Earth.

● Secure Digital Memory Slot:

A recessed slot for the memory card makes it difficult to tamper with the system by removing the card.
